PROFESSIONAL SUMMARY

Computer Science Engineering graduate with hands-on experience in Java, Python, Spring Boot, React.js, JavaScript, HTML5, CSS3, MySQL, and REST APIs. Strong foundation in Object-Oriented Programming, Data Structures & Algorithms, database systems, and problem solving. Experienced in developing full-stack applications and AI/ML projects through internships and academic projects. Familiar with Git, GitHub, Maven, Microsoft Azure, and software development practices, with a strong willingness to learn new technologies and work independently

EDUCATION

J.S.S. ACADEMY OF TECHNICAL EDUCATION BANGALORE

2022-2026

Stream: CSE | VTU University

EXPERIENCE

Java Full Stack Trainee – Codegnan IT Solutions

June-2026 to Present
Hyderabad, Telangana

- Developed Java Full Stack applications using Spring Boot, Hibernate, MySQL, HTML, CSS, and JavaScript.
- Built REST APIs and CRUD applications while strengthening object-oriented programming and database integration skills.
- Used Git and GitHub for version control during project development.

Profile: <https://www.codegnan.me/kushalkumarreddykona>

INTERNSHIP

Full Stack Java Developer Intern - ParvaM Consul-Tech Pvt. Ltd.

Feb-2026 to May-2026
Bangalore, Karnataka

- Contributed to backend development and debugging using Java and Spring Boot.
- Participated in Agile development, code reviews, and software documentation.
- Worked with REST APIs and MySQL to support application features.

GitHub: https://github.com/Kushal1504/Kushal_ParvaMVTU_Internship_2026

Microsoft Elevate Internship - Microsoft Azure

Jan-2026 to Feb-2026
Remote

- Completed hands-on training in Microsoft Azure architecture, storage, and deployment services.
- Performed cloud resource configuration through practical laboratory.
- Learned cloud computing fundamentals and scalable application deployment.

PROJECTS

Java Quiz Application

- Developed a console-based quiz application using Core Java and OOP, supporting MCQ and True/False questions across Java, Python, and DBMS.
- Implemented question randomization, difficulty levels, timed quizzes, automated scoring, and file-based leaderboard management.
- Applied Encapsulation, Inheritance, Abstraction, and Polymorphism to create a modular and maintainable application.

GitHub: <https://github.com/kushalkumarreddy/Quiz-Project-Java>

Technologies Used: Java, OOP, Collections, File Handling, Exception Handling, Eclipse IDE

Clinic Management System

- Developed a full-stack clinic management application with secure login, appointment booking, doctor management, and patient records.
- Implemented role-based access and database connectivity for efficient data management.

GitHub: <https://github.com/kushalkumarreddy/Clinic-Management-System>

Technologies Used: Java, Spring Boot, Thymeleaf, MySQL, HTML, CSS, Bootstrap

AI-Based Skin Disease Detection and Medicine Recommendation System

- Developed a deep learning-based application for skin disease prediction using medical images.
- Built a web application that provides disease predictions and medicine recommendations in real time.
- Integrated image preprocessing and model inference using EfficientNet and OpenCV.

GitHub: <https://github.com/kushalkumarreddy/Skin-Disease-and-Medicine-Recommendation-System->

Technologies Used: Python, TensorFlow, EfficientNet, OpenCV, Flask/FastAPI, HTML, CSS, JavaScript

TECH SKILLS

- Programming Languages:** Java, C, SQL
- Database:** MySQL
- Core CS:** DSA, OOP
- Web Technologies:** HTML5, CSS3, JavaScript, React.js
- Backend:** Spring Boot, Hibernate, REST APIs
- Development Tools:** Git, GitHub, Maven, Eclipse IDE, VS Code
- Cloud:** Microsoft Azure

CERTIFICATES

- Java – Java Full Stack | Codegnan IT Solutions
- Artificial Intelligence & Machine Learning - Microsoft Elevate
- Microsoft Azure - Microsoft Elevate
- Cloud Administration & Engineering - Microsoft Elevate

ACHIEVEMENTS

- Completed internships in Java Full Stack Development and Microsoft Azure cloud technologies.
- Developed three end-to-end academic projects using Java, Spring Boot, Machine Learning, and MySQL.
- Built multiple GitHub repositories showcasing Java, Full Stack, and Machine Learning projects.
